LETA KASAHUN

Software Engineer | Full-Stack Developer

Debre Birhan, Ethiopia | +251 923 695 611 | letakasahun2@gmail.com | https://linkedin.com/in/lkasahun | https://letakasahun.vercel.app

SUMMARY

Fourth-year Software Engineering student (B.Sc.) with hands-on experience building real-world full-stack applications. Strong foundation in software architecture, scalable system design, and maintainable code. Experienced in the SDLC, Agile teamwork, and DevOps practices, with supporting knowledge of QA and project coordination. Strong interest in AI development, continuous learning, and challenging engineering opportunities.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript, Java, Python
Frontend:	Next.js, React
Backend:	Node.js, Express.js, Spring Boot
DevOps & Tools:	Docker, Kubernetes, Git, GitHub Actions
Databases & Caching:	PostgreSQL, Redis
AI & Machine Learning:	LLMs, RAG, NumPy, pandas, scikit-learn
Practices:	Software Architecture, SDLC, Agile, Basic QA & Testing, Project Coordination

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern & Team Leader | gCODE Technologies *Jul 1, 2026 – Oct 24, 2026*

- Contributed to a multi-tier enterprise HRM system, collaborating with a nine-member team across frontend and backend components.
- Coordinated development tasks, supported team collaboration, and helped maintain delivery progress in a fully Agile workflow.
- Participated in daily stand-ups and sprint activities, and tracked tasks using Jira.

Summer Camp Participant | INSA *Jul 25, 2026 – Oct 25, 2026*

- Completed intensive training in software development, AI development, practical challenges, and soft skills.
- Applied the training through hands-on development and delivered EduBridge as the camp graduation project.

Full-Stack Developer Intern | Future Interns *Apr 2026 – Jun 2026*

- Developed a full-stack CRM system.

PROJECTS

EduBridge — AI-Powered Education Platform

- Developed a Progressive Web App (PWA) education platform for schools, academies, and tutorial centers, supporting Grades 7–12 with competency-based and mastery-based learning, learning materials, practice exams, assessments, bookmarks, and student progress tracking.
- Implemented multi-tenant architecture, role-based access control, offline learning and synchronization, exam preparation, teacher-approved AI question generation, and a Retrieval-Augmented Generation (RAG) tutor.
- **Technologies:** Next.js, TypeScript, Express.js, Prisma, PostgreSQL, pgvector, Redis, LLMs, RAG, Docker, GitHub Actions.

Civil Service Human Resource Management System

- Multi-tier enterprise HRM system covering recruitment, employee management, attendance, leave, performance, transfers, payroll, finance, delegation, clearance, termination, reporting, and approval workflows across regional, zonal, woreda, and sector levels in the Amhara Region.
- **My contributions:** Developed full request desks for more than 10 request types (such as transfer, termination, overtime, etc.), each with complete dynamic approval configuration and approval handling, along with clearance management and digital letter generation.
- **Technologies:** Next.js, TypeScript, Tailwind CSS, Express.js, Prisma, PostgreSQL, Redis, JWT, Swagger, Docker, GitHub Actions.

Customer Relationship Management (CRM) System

- Built a full-stack CRM supporting the customer lifecycle from lead capture and tracking through deal management and conversion.
- Implemented user management, role-based access control, notifications, Gmail and Telegram integrations, and AI-assisted lead analysis and replies.
- **Technologies:** TypeScript, Next.js, Express.js, PostgreSQL.

EDUCATION

B.Sc. in Software Engineering | Debre Birhan University *Expected Graduation: 2028*

CERTIFICATIONS

- **Internship Completion Certificate** – Full-Stack Developer & Team Leader, gCODE Technologies
- **Fundamentals of Artificial Intelligence** – Udacity
- **Fundamentals of Programming** – Udacity
